

HEPATITIS TESTING DAY

MAY 4, 2022

Hepatitis Awareness Month:

May is Hepatitis Awareness Month to raise and spread awareness about viral hepatitis.

- Hepatitis Awareness Month aims to dismiss the negative social stigma surrounding hepatitis.
- The goal for Hepatitis Awareness Month is to let people know about the various care and treatment options available for hepatitis.
- Hepatitis A and hepatitis B are preventable by vaccination and hepatitis C is curable with a short course of treatment.
- Follow @cdchep on Twitter and use #KnowHepC to join the conversation and raise awareness about the importance of all adults getting tested for hepatitis C.

**Free Hepatitis C
Testing for adults
(18 years and older)**

**Have you heard..
Hep C can be cured.**

**Hepatitis C is a
leading cause of
liver cancer**

**Millions of
Americans have
hepatitis C ..
many don't know it.**

**Getting tested could
save your life.**
